

MOHAMMAD NOMAN

Full Stack Developer — React · JavaScript · Node.js · MongoDB
Nagpur, MH | +917028106759 | mohammadnomancoc@gmail.com | LinkedIn | GitHub
Portfolio: mohammadnoman.vercel.app | github.com/mohammadnomancoc-eng
Immediate Joiner · Open to Relocate

Summary

Full Stack Developer with 1+ year of production experience — end-to-end ownership from UI to REST API to database schema — across React, TypeScript, Node.js/Express, and MongoDB/Firebase. Shipped 3 live client products serving 6,000+ daily users, including a layered EMS backend (RBAC, geofenced attendance, automated document generation) and an AI-powered diagnostic platform. Comfortable working with minimal oversight, writing typed, maintainable code.

Skills

Languages: JavaScript (ES6+), Core Java, Python **Web & Frontend:** React.js, Redux, Tailwind CSS, Framer Motion, HTML5/CSS3

Backend & APIs: Node.js, Express.js, REST API Design, JWT Authentication, Socket.io, Vercel Serverless Functions

Database & Cloud: MongoDB, Firebase, Supabase (PostgreSQL), Firestore

Tools & Practices: Git/GitHub, Docker, Postman, Vercel, Netlify, Google Tag Manager, Meta Pixel

Experience

Full Stack Developer Intern — Chetan's Royals Webtech Pvt. Ltd., Nagpur, MH

Employee Management System (EMS) — 40+ employees daily

Dec 2025 – Present

Stack: React · Node.js · Firebase (Auth + Firestore) · Vercel Serverless Functions

- Architected a layered service structure (route → service → data-access) around Firestore, replacing wildcard security rules with production-grade RBAC — closing a vulnerability that exposed restricted employee data to any authenticated user.
- Built a biometric face-recognition attendance system with Haversine-based GPS geofencing, validating location and identity server-side before writing check-in records.
- Shipped a drag-and-drop ID card designer with automated PDF generation, resolving Firestore write failures through custom ID serialisation — reducing failed writes to zero in testing.

HeadTrixx (headtrixx.com) — Hair-Care E-commerce · 2,000–3,000 daily visitors

Stack: React · Vite · REST APIs · Cloudinary · Google Tag Manager · Meta Pixel

- Built a 'Watch and Shop' video-commerce feature (React, IntersectionObserver) backed by a Cloudinary-integrated REST API, giving admins a self-serve panel to manage shoppable video content.
- Implemented a COD checkout flow and promo/coupon evaluation engine across a 27,000-line, 12-table production codebase, shipped without breaking existing checkout paths.

Zootopia Resort and Restaurant (zootopiarresortandrestaurant.com) — 4,000–5,000 daily visitors

Stack: React · Node.js · Express · Firebase (Firestore) · Socket.io

- Designed and built an 18-endpoint REST API with dual-token JWT authentication, plus a custom Axios interceptor queuing requests during token refresh — eliminating race conditions during expiry.
- Owned the booking/reservation engine end to end, from Firestore schema through API to a secure admin panel used for real-time content management.

Projects

AI-Driven Alzheimer's Diagnostic Platform — alzheimeraai.vercel.app | github: Alzheimers-Detection-Using-ML

Stack: React · Flask · PyTorch · OpenCV · ReportLab

- End-to-end diagnostic web app integrating a PyTorch ResNet18 model classifying brain MRI scans across four dementia stages; Grad-CAM heatmap pipeline and automated clinical PDF reports in under 30 seconds.

A Faire — Productivity and Goal Tracker SPA — a-faire.vercel.app | github: -Faire
2026

Dec 2025 – Jan

Stack: React · Supabase (PostgreSQL + Auth + RLS) · Framer Motion

- Dual-planner app (timeline + calendar) with bidirectional task/goal sync and deduplicated push reminders via the Web Notifications API, backed by Row-Level-Security-scoped Supabase tables.

WhereTF — Campus Lost and Found

Feb 2025 – Apr 2025

Stack: Node.js · Express · React 18 · MongoDB · Socket.io

- Solo-designed and built an 18-endpoint REST API with JWT auth and MongoDB schema, enabling students to report, browse, and claim lost/found items in real time.

Education

B.Tech — Computer Science and Engineering · Anjuman College of Engineering and Technology, Nagpur, MH · 2022–2026 · Graduated May 2026 · CGPA: 6.79/10

HSC (CBSE): Al Irfan Secondary School, Aurangabad · 2020–2022 · 85%

SSC (CBSE): St. Vincent Pallotti School, Nagpur · 2019–2020 · 78%
